

Triple Simple Moving Averages Strategy With PSAR

Here's a good strategy based on 3 Simple Moving Averages (MA) and Parabolic SAR.

You can apply this strategy on any currency pair and timeframe's starting from the 1-minute charts and above.

Forex Indicators*: 12 period Simple Moving Average, 26 period Simple Moving Average, 52 period Simple Moving Average, Parabolic SAR (PSAR)

*You will find all indicators by default on MT4 and MT5.

Timeframe's: Any

Currency Pairs: All

Trading Strategy

Buy Conditions

BUY when the 12 period SMA crosses the 26 period SMA and 52 period SMA from below, and PSAR dots below the price. Set original stop loss at the PSAR dots and trail stop up OR set stop loss below the most recent swing low and take profit at risk-to-reward 1:2.

Sell Conditions

SELL when the 12 period SMA crosses the 26 period SMA and 52 period SMA from above, and PSAR dots above the price. Set original stop loss at the PSAR dots and trail stop down OR set stop loss above the most recent swing high and take profit at risk-to-reward 1:2.

Example (EUR/USD 1 hour chart)
